

THE STARTER GUIDE

COUNT.

Your workouts just got valuable.
Here's how to make the most of it.

countfitness.app · hey@countfitness.app

The whole thing, in 60 seconds.

COUNT pays you back for working out. You log your workouts in the app, you earn points, and you trade those points for real products from real brands you actually use.

There's no catch. No subscription. No premium tier. Every workout you log is points in the bank.

Three steps. That's the whole product.

1. Log. Open the app, tap log, pick what you did. Walk, lift, run, swim, yoga — any movement counts. One log = one point baseline.

2. Earn. Streaks multiply your points. Two days in a row gets you 1.5x. Five days = 2x. Ten days = 2.5x. The longer you stay consistent, the faster the points stack.

3. Redeem. Once you've got enough points, hit the rewards catalog and trade them for products. Supplements, apparel, gear — the kind of stuff you'd buy anyway.

The streak math:

Streak Length	Multiplier	What That Means
Day 1	1.0x	Baseline. 1 point per log.
Days 2-4	1.5x	1.5 points per log.
Days 5-9	2.0x	Now you're cooking.
Day 10+	2.5x	Top tier. Don't break it.

Miss a day and the multiplier resets. That's the game.

What you can earn.

We're picky about partners. Every brand in the rewards catalog is one we'd use ourselves — no junk, no random no-name supplements. The list grows every month.

Live now in the catalog:

Brand	What They Do
Thorne	Premium supplements, vitamins, performance nutrition
Momentous	Athlete-grade protein and recovery products

Coming soon:

Gymshark · Lululemon · Vuori · Ten Thousand · Brooks Running · AG1 · Optimum Nutrition · Ghost · Celsius · Alani Nu · Transparent Labs · Hyperice · Bodybuilding.com

Plus a few more we can't announce yet. New brands drop on the first of every month.

Tiers and how you climb them.

Every COUNT user has a tier — Bronze, Silver, or Gold — based on their lifetime points. Higher tiers unlock better redemptions, early brand access, and leaderboard placement.

Tier	Lifetime Points	Perks
Bronze	0 - 99	Standard rewards catalog
Silver	100 - 499	Bonus redemptions + early brand previews
Gold	500+	Top-tier rewards + Founding Crew eligibility

Five moves to get to your first reward fast.

1. Log every workout, no matter how small.

A 20-minute walk counts the same as a 90-minute lift session for streak purposes. Don't skip days because you only had time for a quick session — the streak is the asset.

2. Set a daily reminder.

The #1 reason streaks die is forgetting to log. Set a phone reminder at 9pm. Log it, even if you did it that morning.

3. Aim for the 10-day streak first.

Day 10 unlocks the 2.5x multiplier — that's where the points start to compound. Once you're there, every log earns 2.5 instead of 1. The math gets serious fast.

4. Watch the rewards catalog before you redeem.

New brands drop monthly. If you're close to a redemption, check what's coming — you might want to hold and grab a better reward instead.

5. Bring your gym crew.

We just launched a tiered referral program. Every friend who joins via your link earns you bonus points and unlocks milestone rewards. At 10 friends, you're Founding Crew — early access to every new brand and your name on the website. Find your link in Profile → Refer a Friend.

From me.

I built COUNT because I was tired of the exchange being one-way. Years of grinding in the gym, spending money on supplements and gear, and the apps on my phone just tracked me. No one was paying me back.

So I built something where they do. Every workout you log is an investment. Your consistency turns into points. Points turn into products from brands worth using. That's it.

If you ever have a question, a brand you want to see, or feedback on the app — reply to any of my emails. I read every one.

Now go log a workout.

— Joe
